

## ABSTRACT OF THE DISCLOSURE

The present invention relates to a composition, in particular a cosmetic composition, to care for and/or make up the skin and/or integuments and/or the lips, which can be in the form of a cast product or a gel, comprising at least one non-volatile hydrocarbon-based oil with a molecular mass ranging from 230 to 420 g/Mol, a non-volatile silicone compound which is soluble or dispersible in the non-volatile hydrocarbon-based oil, and an inert particulate phase containing at least one chemically inert filler. The invention also relates to a care or make-up process for the skin, integuments and the lips using such a composition. More especially, the invention is a solid make-up product for the lips, having transfer-resistance and migration-resistance properties while at the same time being glossy and comfortable to wear over time.
